CA7 - Coded Access

- 99 Codes
- Two output relays
- 1-8 digit codes
- Master code secure programming
- Stand alone or integrated

The CA7 coded access system gives an extra dimension to an Entryphone® system providing additional features that enhance convenience and security.

While visitors can be admitted in the usual way using the Entryphone® system, a problem arises when authorised personnel need to gain access. The usual method to allow entry for an authorised person is to issue them with a key; however, this can cause problems if a key is lost or stolen or the individual is no longer authorised. Changing the lock and re-issuing keys can be expensive and inconvenient.

The coded access system solves these problems. By entering the correct 1-8 digit code, authorised personnel can gain access. No keys are necessary and the code numbers and the release time can be changed quickly and easily by the use of the master code.

Available in brushed or mirror polished stainless steel.

Dimensions (mm)

	Height	Width	Depth
surface frame	216	89	38
back box	203	76	38

CA7/S-M	Mirror stainless surface mounted
